(54) FUEL INJECTION VALVE

(57)Abstract:

PURPOSE: To reduce knocking abrasion and sliding abrasion of a valve body and a valve seat at the time of using alcoholic fuel having small liquid lubricating action or gas fuel in which the liquid lubricating action is not carried out.

CONSTITUTION: At least the valve part 7 of a movable core 6 and a valve seat forming body 5 are formed of iron system metal member, and boron is permeated in one of the valve part 7 and the valve seat forming body 5 or both thereof, and then the boride layer of Fe_2B is formed on the metal surface thereof.

LEGAL STATUS

[Date of request for examination]

09.05.1994

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 2571746

[Date of registration] 24.10.1996

[Number of appeal against examiner's
decision of rejection]

[Date of requesting appeal against examiner's
